

FAPA Judicial Child Trafficking

FAPA or Fake Allegations of Parental Alienation is a disturbing practice being used by family court judges across the nation to strip custody of protective mothers and award abused children to their abusive fathers. **#FAPA**

FAPA is a proven moneymaker for the court system because it uses it to order something called "reunification therapy," a fee-based brainwashing therapy that lines the pockets of court appointees like guardian ad litem and therapists. **#FAPA**

FAPA, which has been condemned by dozens of legal and mental health organizations, is systematically being promoted by so-called father rights groups as part of its campaign to pass sweeping legislation that frees fathers of child support obligations. **#FAPA**

This family court pandemic has been likened to the practices of Sharia law. More than 800 children have been murdered by an abusive parent after a judge in a private divorce and/or custody case used FAPA to award them custody. **#FAPA**

FAPA is in complete violation of the Daubert standard, a mandatory test all judges must use to determine the admissibility of evidence. **#FAPA**
